devoted to chaos theory and its application to nursing. The first issue of this journal appeared in 1994. Murray (1997), supports the view that there is little nursing literature on chaos theory and has stated that there is minimal nursing-related material which deals with chaos, complexity or nonlinear dynamics.

Chaos theory is a branch of mathematics focusing on the behavior of dynamical systems that are highly sensitive to initial conditions. 'Chaos' is an interdisciplinary theory stating that within the apparent randomness of chaotic complex systems, there are underlying patterns, constant feedback loops, repetition, self-similarity, fractals, self-organization, and reliance on programming at the ...
