The above rules apply to any data, in the framework of the Inventory of Butterflies and Burnet Moths of Aquitaine whether it is used for the future atlas or any other published synthesis, or that has been provided previously at any time.

A simplified key to the Butterflies of Aquitaine

The annual migration of North America's monarch butterfly is a unique and amazing phenomenon. The monarch is the only butterfly known to make a two-way migration as birds do. Unlike other butterflies that can overwinter as larvae, pupae, or even as adults in some species, monarchs cannot survive the cold winters of northern climates.
