brain are not working together, the story will be either chaotic and confused--overwhelming feeling, overwhelmed thought--or superficially logical but lacking the emotional oomph of a good coherent autobiographical story. There is a connector between the two sides, the corpus callosum. This is how the two sides of the brain communicate.

How Trauma Impacts the Brain - Rachel's Vineyard

When a blood vessel on top of or in the brain ruptures, blood flows into brain areas where it isn't supposed to go. It may pool in brain tissues, resulting in a blood clot. When the blood vessel is ruptured, blood isn't transported where it should go to support brain function. As a result, the brain doesn't get the oxygen it needs.
