10 Things Every Linux Programmer Should Know

Programmers write programs according to the specifications determined primarily by more senior programmers and by systems analysts. After the design process is complete, it is the job of the programmer to convert that design into a logical series of instructions that the computer can follow.

Programmer - Wikipedia

Hi and thanks for the excellent poster. I was wondering if you had some real world implementations you would be willing to share. I was hoping to get an example of how to model a composite document that could be used to maintain the technical implementation for a complex IT infrastructure.

Cargo cult programming is a style of computer programming characterized by the ritual inclusion of code or program structures that serve no real purpose. Cargo cult programming is typically symptomatic of a programmer not understanding either a bug they were attempting to solve or the apparent solution (compare shotgun debugging, deep magic). The term cargo cult programmer may apply when an ...
