

framing floors walls ceilings pdf

Framing, in construction, is the fitting together of pieces to give a structure support and shape. Framing materials are usually wood, engineered wood, or structural steel. The alternative to framed construction is generally called mass wall construction, where horizontal layers of stacked materials such as log building, masonry, rammed earth, adobe, etc. are used without framing.

A wall is a structure that defines an area, carries a load, or provides shelter or security. There are many kinds of walls, including: Defensive walls in fortifications; Walls in buildings that form a fundamental part of the superstructure or separate interior rooms, sometimes for fire safety; Retaining walls, which hold back dirt, stone, water, or noise sound

Which Way Should Hardwood Floors Run? Do you notice the direction hardwood flooring runs when you walk into a house? It can make a big difference in how it looks and how it behaves over time. Rule number one in laying hardwood flooring is the wood boards should run perpendicular to the floor joists below. This allows the boards to â€œspanâ€• from one joist to the next and be much more solid.
