Amplitude modulation (AM) is a modulation technique used in electronic communication, most commonly for transmitting information via a radio carrier wave. In amplitude modulation, the amplitude (signal strength) of the carrier wave is varied in proportion to that of the message signal being transmitted. The message signal is, for example, a function of the sound to be reproduced by a ...

**Amplitude modulation - Wikipedia**

The electromagnetic spectrum is the range of frequencies (the spectrum) of electromagnetic radiation and their respective wavelengths and photon energies.. The electromagnetic spectrum covers electromagnetic waves with frequencies ranging from below one hertz to above 10<sup>25</sup> hertz, corresponding to wavelengths from thousands of kilometers down to a fraction of the size of an atomic nucleus.

**Electromagnetic spectrum - Wikipedia**

Electromagnetic spectrum is the range of frequencies (the spectrum) of electromagnetic radiation and their respective wavelengths and photon energies. The electromagnetic spectrum covers electromagnetic waves with frequencies ranging from below one hertz to above 10<sup>25</sup> hertz, corresponding to wavelengths from thousands of kilometers down to a fraction of the size of an atomic nucleus.
