Logic Models are a popular tool that can be used to help conceptualize your change effort. It does this by inviting the author(s) to articulate their understanding of the current situation, the changes they hope to bring about through their program effort, with and/or for whom, the activities planned to contribute toward this change, the resources needed to put into the effort, assumptions they ...

Logic models are hypothesized descriptions of the chain of causes and effects (see Causality) leading to an outcome of interest (e.g. prevalence of cardiovascular diseases, annual traffic collision, etc). While they can

be in a narrative form, logic model usually take form in a graphical depiction of the "if-then" (causal) relationships between the various elements leading to the outcome.
