of this text is to cover topics on the C programming language and introductory software design in sequence as a 20 lecture course, with the material in Chapters 2, 7, 8, 11, and 13 well served by two lectures apiece.

An Introduction to the C Programming Language and Software

Object-oriented programming is our introduction to data abstraction. We emphasize the concepts of a data type (a set of values and a set of operations on them) and an object (an entity that holds a data-type value) and their implementation using Java's class mechanism. We teach students how to use, create, and design data types.
