Entacapone, sold under the brand name Comtan among others, is a medication commonly used in combination with other medications for the treatment of Parkinson's disease. Entacapone together with levodopa and carbidopa allows levodopa to have a longer effect in the brain and reduces Parkinson's disease signs and symptoms for a greater length of time than levodopa and carbidopa therapy alone.

One of the most important roles for pharmacy technicians who participate in medication therapy management (MTM) is to develop and maintain the documents and paperwork involved in MTM.

2017 Update: Module 2. Medication Therapy Management

Rising Drug Costs Drive the Need for MTM. For the Medicare program, cost savings is a major goal for MTM. Americans' spending on both prescription and nonprescription drugs has grown exponentially over the past 50 years, from \$4 billion to over \$324 billion (. 5 Expenditures for drugs are projected to grow an additional 6.7% per year through the year 2025. 6

2017 Update: Module 1. Introduction to Medication Therapy

Isosorbide dinitrate or mononitrate is used for the acute relief of angina pectoris, for prophylactic management in situations likely to provoke angina attacks, and for long-term prophylactic management of angina pectoris. b Conventional measures in the management of angina pectoris are aimed at ...

254 glp-1 agonists, including semaglutin, liraglutide, and dulaglutide, are used for the treatment of type 2 diabetes mellitus. These medications work by mimicking the action of the hormone glucagon-like peptide-1 (GLP-1), which is secreted by the L-cells of the pancreas. GLP-1 agonists increase insulin secretion and decrease glucagon secretion, leading to improved glucose control. They also have beneficial effects on weight and cardiovascular risk factors. Semaglutin is a long-acting GLP-1 agonist that is administered once weekly. Liraglutide is a daily GLP-1 agonist. Dulaglutide is a weekly GLP-1 agonist. These medications are generally well-tolerated, but common side effects include nausea, vomiting, and constipation. More serious side effects, such as pancreatitis and gallbladder disease, have been reported. It is important to use these medications as directed and to monitor for any adverse effects.
