The first-move advantage in chess is the inherent advantage of the player who makes the first move in chess. Chess players and theorists generally agree that White begins the game with some advantage. Since 1851, compiled statistics support this view; White consistently wins slightly more often than Black, usually scoring between 52 and 56 percent.. White's winning percentage is about the same ...

The precursors of chess originated in northern India during the Gupta empire, where its early form in the 6th century was known as Chaturanga. This translates as 'the four divisions', meaning infantry, cavalry, elephantry, and chariotry, represented by the pieces that would evolve into the modern pawn, knight, bishop, and rook, respectively. p173; p74 ...

K-level thinking refers to a class of logic problems in which all actors are perfectly rational and possess infinite intelligence. In other words, all actors are able to reason perfectly about their situation, and know that everyone else shares the same capability. Without further qualification, the term "logic puzzle" or "logic problem" usually refers to this type of situation.

Intelligence To be intelligent you first have to know what being Intelligent is. And you also have to know what being ignorant is. Ignorant is just another word for "Not knowing".But not knowing is not always obvious or clearly understood.That's because learning is not fully understood. The more you learn the more you should realize what you didn't know.
