Logistic functions are used in logistic regression to model how the probability  $p$  of an event may be affected by one or more explanatory variables: an example would be to have the model  $p = \frac{1}{1 + e^{-ax - b}}$  where  $x$  is the explanatory variable and  $a$  and  $b$  are model parameters to be fitted and  $f$  is the standard logistic function.. Logistic regression and other log-linear models are also commonly used in ...

Geologic modelling, Geological modelling or Geomodelling is the applied science of creating computerized representations of portions of the Earth's crust based on geophysical and geological observations made on and below the Earth surface. A Geomodel is the numerical equivalent of a three-dimensional geological map complemented by a description of physical quantities in the domain of interest.

Previous studies of the so-called frontier production function have not utilized an adequate characterization of the disturbance term for such a model.

### **Formulation and estimation of stochastic frontier**

Highlights We define the concepts relevant for yield gap analysis. We review different methods for local and global yield gap analyses. Global methods are coarse and local studies use different methods. A number of methods is compared using data sets from three regions. Components of a protocol for global yield gap analysis with local relevance are proposed.

Now that 2018 is upon us, itâ€™s long past time for an updated list of the best ebook readers for reading PDFs. Way back in 2010 I posted an article outlining the best PDF ereaders, and itâ€™s been updated a few times, but things have slowly changed over the years so itâ€™s time for an updated list as we look into 2018.

Introduction. The concept of precaution is of great relevance in environmental regulation in many countries. Despite the somewhat vague nature of the legislation, some attention has recently been given to the precautionary principle within frameworks and models of economic interpretation and their application.
