Uncertainty is a situation which involves imperfect or unknown information. It applies to predictions of future events, to physical measurements that are already made, or to the unknown. Uncertainty arises in partially observable and/or stochastic environments, as well as due to ignorance, indolence, or both. It arises in any number of fields, including insurance, philosophy, physics ...

This study originally arose out of an e-mail discussion with Rafael Capurro at the artefactphil discussion group in 1999. I am therefore indebted to him for important impulses. Cf. Rafael Capurro's analogous article Beitrage zu einer digitalen Ontologie (Contribution to a Digital Ontology), from which the present study

deviates considerably in both content and scope of presentation.
