Wireless Sensor Networks (WSN) provide a bridge between the real physical and virtual worlds. Allow the ability to observe the previously unobservable at a fine resolution over large spatio-temporal scales. Have a wide range of potential applications to industry, science, transportation, civil infrastructure, and security.

proposed schemes concerning security in these networks are also discussed. And finally we conclude the paper delineating the research challenges and future trends toward the research in wireless sensor network security. Index Terms: wireless sensor networks, network attacks, security design challenges, symmetric and asymmetric

wireless sensor networks. We also discuss the holistic view of security for ensuring layered and robust security in wireless sensor networks. Keywords: Sensor, Security, Attack, Holistic, Challenge. 1. Introduction Wireless Sensor Networks (WSN) are emerging as both an important new tier in the IT ecosystem and a rich domain of

MiniSec is a secure network layer protocol for wireless sensor networks. It provides confidentiality, data authentication, replay protection and weak message freshness with low energy consumption.

control instructions via distributed sensor networks. A wireless sensor network (WSN) is a network formed by a large number of sensor nodes where ... device access, trust security and privacy, and service architectures to name a few. Section 5 provides information on applications.

3. Security Requirements in Wireless Sensor Networks A WSN is a special type of network. It shares some commonalities with a typical computer network, but also exhibits many characteristics which are unique to it. The security services in a WSN should protect the information communicated over the network and the resources from

the field of wireless sensor network security. Thus, familiarity with the current research in this field will

benefit researchers greatly. With this in mind, we survey the major topics in wireless sensor network security, and present the obstacles and the requirements in the sensor security, classify many of
