Language features. Like the BASIC programming language, Visual Basic was designed for an easy learning curve. Programmers can create both simple and complex GUI applications. Programming in VB is a combination of visually arranging components or controls on a form, specifying attributes and actions for those components, and writing additional lines of code for more functionality.

Visual Basic - Wikipedia

A hash is an output string that resembles a pseudo random sequence, and is essentially unique for any string that is used as its starting value. Hashes cannot be easily cracked to find the string that was used in their making and they are very sensitive to input change. That is to say, just a change ...

Visual Basic for Applications/String Hashing in VBA

Get Started scripting language. A scripting language is a form of programming language that is usually interpreted rather than compiled. Scripting languages are typically converted into machine code on the fly during runtime by a program called an interpreter.
