Manual - Documentation - Zend Framework

Zend Framework 1 was one of the first major frameworks for PHP 5 and, for many, introduced object-oriented programming principles for writing PHP applications. Many developers looking to embrace a well-architected and supported framework chose to use it as the foundation for their applications. However, the first version was not without its faults.

Next, a font resource is defined, as an instance of `Zend_Pdf_Font`. This may be either one of the 14 built-in font constants (look in the `Zend_Pdf_Font` class definition for a list of font constants), or an external font file. This font resource is then attached to the page with a call to the `Zend_Pdf_Page` object's `setFont()` method.
